1 Nature of operations

X-Terra Resources Corporation (the “Company”), an exploration stage company, is in the business of acquiring, exploring and developing mining and oil and gas properties. It has interests in properties at the exploration stage located in Canada.

The Company is in the process of exploring its mining and oil and gas property interests and has not yet determined whether they contain mineral deposits that are economically recoverable. The Company will periodically have to find additional funds to continue its exploration activities, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

Until it is determined that properties contain mineral reserves or resources that can be economically mined, they are classified as exploration properties. The recoverability of deferred exploration expenses is dependent on the discovery of economically recoverable reserves and resources; securing and maintaining title and beneficial interest in the properties; the ability to obtain necessary financing to continue the exploration and development of its properties; and future profitable production or proceeds from the disposal of properties.

The unaudited interim consolidated financial statements of the Company have been prepared by management in accordance with Canadian generally accepted accounting principles (“GAAP”), except that they do not contain all disclosures as required for audited annual financial statements. The unaudited interim consolidated financial statements have been prepared following the same accounting policies as for the consolidated financial statements for the year ended December 31, 2009. Accordingly, they should be read in conjunction with the 2009 consolidated financial statements and the notes thereto. In the opinion of management, all adjustments considered necessary for fair presentation of the results for the periods presented have been reflected in the unaudited interim consolidated financial statements. All dollar amounts are disclosed in Canadian dollars.

As at March 31, 2010, the Company holds the Lindsay, Cool Lake, Rimouski, Rimouski North and Shawinigan properties and has cash and cash equivalents totalling \$2,503,065 and working capital of \$4,901,860.

	<u>1,258,000</u>	<u>1,258,000</u>	<u>2,050,000</u>	<u>2,050,000</u>

* These investments are the result of a transaction completed on October 28, 2008 between the Company and Brownstone Ventures Inc. ("Brownstone") to which the Company sold a 50% interest in exploration licences in exchange for 2,000,000 common shares and 2,000,000 common share purchase warrants. Each purchase warrant entitles the Company to purchase one common share of Brownstone at a price of \$2 until October 28, 2010. The exploration licences sold are related to the Rimouski, Rimouski North and Shawinigan mining and oil and gas properties (note 5).

The fair value of warrants is determined through the use of Black-Scholes pricing models as they are not traded on any public stock exchange.

For the three-month period ended March 31, 2010, the Company recognized an unrealized loss of \$560,000 (2009 – \$210,500) on common shares of a public company designated as available for sale in other comprehensive income and a \$232,000 unrealized loss (2009 – \$34,316) on warrants of a public company classified as held for trading was included in net loss for the quarter.
